

## **SEATING SYSTEM AND METHOD OF FORMING SAME**

### **Abstract of the Disclosure**

The present invention discloses a seating system that includes a seat back (20) with one or more plastic panels (22, 24) that extend across a lateral distance (D<sub>2</sub>) of the seat back (20). The seat back (20) preferably includes one or more channel forming ribs (50, 54, 58). Optionally the seat back (20) will be anchored to a body of an automotive vehicle with an improved attachment system (100).
